

Our client **AGroup** is a leading HR digitalization software & service provider in Baltic and Eastern Europe and is looking for

Junior Java Developer

You will be a part of the software development team helping consultants by delivering modern and efficient solutions with the use of innovative technologies.

Responsibilities:

- Analyze system design requirement documents; communicate to a system analyst(s) to clarify system requirements and make common decisions on implementing product functions or features.
- Deliver high quality code implementing required functions and features using the company accepted agile methodology and tools; meet software delivery deadlines in accordance with approved development plans.
- If required, troubleshoot own code and the code produced by other developers helping in the provision of the second line support.
- Proactively report to Team Lead when an assigned task is completed or when an issue arises during a task execution.
- Cooperate within your own development team and other teams and departments to solve issues that arise performing everyday duties.

Skills and qualifications:

- 1+ year experience in JAVA programming & be a fan of it.
- Hands-on experience in SQL and RDBMS.
- Fluent in Latvian and English, Russian preferred.
- Clear understanding of modern development methodologies and patterns.
- Be a responsible and self-motivating person.
- A passion for IT technologies.

Company offers:

- Remuneration from 1400 up to 1700 EUR gross, depending on your qualifications and background.
- Work on international projects.
- Competitive employee benefits package (incl. medical insurance, cell phone, etc.)
- Perspectives of professional & career growth.
- Flexible work schedule.

If you see yourself in this position, please send your CV to selection project manager Dace Zariņa to info@lv-vid.e.lv till **16.02.2022**

If you have any questions, please don't hesitate to call: **+371 26870690**
