

Baltic Microsoft Developers Community

Are you an IT student or just starting out in the world of tech?

Make your move in the IT game – join the Microsoft Developers Community. The community offers to specialize in one of the world's most popular branches of tech - learn new skills, acquire a free certification, and gain valuable contacts for the future!

After the training, you will know how to get an internship in the Top Worldwide IT companies.

Check out our development plan

Free training and certification to boost your skills with the latest tools and prepare for the OpenHack hackaton

Hackathon to challenge your skills by developing new solutions and competing for valuable prizes

Meetups to get inspired, gain knowledge & network with like-minded people

Training

To support students and people who are just starting their careers with Microsoft technologies we are organizing guided study group we call

“Let's build” that will focus on covering a range of different technologies and how they can be used together to build practical, working software.

You will have access to **self-study materials** and join **weekly live coding** and Q&A sessions with mentors.

Training

Training program will **kick-off in April** and will run for 8 weeks while covering topics like:

- Azure DevOps/Github,
- Vue.js,
- ASP.NET,
- application deployment, unit testing and code quality,
- CosmosDB and EntityFramework,
- Azure Functions and Logic Apps.

Training will also prepare you for participation in the OpenHack **Hackathon** in June.

OpenHack is a developer-focused engagement where a wide variety of participants (Open) **learn through hands-on experimentation** (Hack) using challenges based on real-world customer scenarios designed to mimic the developer journey.

OpenHack provides a unique and fun upskilling experience with participants work together in teams to tackle real-world challenges, requiring deep collaboration, as they learn together under the guidance of Microsoft trainers.

We are powered by:

Meetups

February 18

Why Azure is cool -ecosystem, industry demand; Azure DevOps; Application insights
